About

Industrial and Production Engineering student at NIT Jalandhar with a focus on data analytics and data science. Proficient in Python (pandas, NumPy, Matplotlib) for analysis and visualization. Experienced in AI solutions, including leading a multilingual chatbot for Smart India Hackathon 2025. Skilled in web development and database management to build data-driven applications.

Education

Dr. B. R. Ambedkar National Institute of Technology Jalandhar 2025 – 2029 (Expected)
B.Tech in Industrial and Production Engineering

- **Relevant Coursework:** Data Analytics, Statistics, Operations Research, Production Planning & Control
- **Technical Focus:** Statistical Analysis, Data-Driven Decision Making, Process Optimization

Technical Skills

Programming Languages: Python, JavaScript, HTML, CSS , TypeScript

Libraries & Frameworks: pandas, NumPy, Seaborn, Matplotlib, Flask , FastAPI , Tailwind CSS

Databases: PostgreSQL, MongoDB

Tools & Platforms: Linux, Docker, Git, GitHub

Projects

Raj Siksha Mitra - AI-Agnostic Chatbot GitHub Repository

- **Smart India Hackathon 2025:** Led development as sole developer in 6-member team, advanced to second round
- Built AI-powered FAQ chatbot for Rajasthan educational institutes using Google Gemini API
- Implemented multilingual support (English, Hindi, Rajasthani) with speech-to-text integration
- Developed automated data fetching system from websites & social media for real-time response updates
- Created platform-agnostic design with Flask backend and PostgreSQL database for scalable deployment
- Open-sourced solution addressing real Ministry of Rajasthan problem statement
